

Year 1 Autumn Term 2018

Reading	Writing	Maths
Read with your child for 5 minutes everyday and write in their reading record.	Support your child in learning to read and spell their weekly words.	Work through your child's maths passport targets.

Our Topic this term is ... **The Jolly Postman**

As Writers, we will explore a range of genres inspired by Janet and Allan Ahlberg's book 'The Jolly Postman and Other People's Letters.' We will become authors of stories, write revolting recipes, publish some posters and even post some letters of our own!

As Scientists, we will plant and observe the growth of a beanstalk. We identify and name a variety of everyday materials and use our investigative skills to explore their properties.

As Geographers, we will follow the journey of the Jolly Postman and explore a variety of maps of the local area and investigate symbols and what they represent. We will name and locate the countries of the UK and their capital cities.

As Artists, we will design our own stamp and create a colourful collage inspired by postage stamp pictures.

As Engineers, we will evaluate and improve buildings and structures from some of our favourite traditional tales and compare these to famous buildings from around the world.

Our very own 'Jolly Postman' will be paying us a visit into class too!
